

Kaymar Announces

July, 2009

PRESS RELEASE – Kaymar 4x4 Accessories

Land Cruiser 200 Rear Bar (Part #K20000)

While it would surprise the designers at Toyota, Kaymar has come up with an improved rear bar for the LC200 delivering a greater departure angle for enhanced off-road driving, tougher rear end vehicle protection and the base platform for building a comprehensive accessory carrier system for a combination of spare wheels, jerry cans, telescopic work light, UHF/HF aerial mounts, HiLift jack and more.

This is a two section bar (left and right sides) manufactured with rolled 4mm flat steel and zinc coated before receiving a high quality powder coat finish. Coming in at only 36kg it fits neatly around the existing factory towbar and factory mud flaps and sports new technology LED signal lights which are vibration resistant and fully sealed against weather and dust.

Truly an accessory investment to enhance the Land Cruiser 200 and last the life of the vehicle.

K20000 Land Cruiser 200 Rear Bar \$1450.00 inc. GST

A complete list of add-on carrier pivots and arms and accessory mounts is viewable on the Kaymar website.
