

## Kaymar Announces

October 2010

### Ute Bar Range

(for Hilux 1989+, Ford Ranger, Mazda BT50, ML Triton, Holden Rodeo/DMax/Colorado 2003+)

Keep space free in your ute tray for camping gear and other travelling needs.

The range of Kaymar rear step/towbars now available for most popular 4x4 utes removes bulky spare wheels and fuel cans outside the carrying tray making them both more easily accessible and clearing room for your gear.

Each bar features a tested and rated integral towbar, under-panel protective bar which is chassis attached for rear tub protection, zinc plated and satin black powder coated finish, LED signal lights, strong steel construction to enhance rear end protection while greatly improving the departure angle of the vehicle.

A complete carrying system can be fitted to the bar by adding optional carrier arms enabling storage of a spare wheel (single only) and jerrycan (single only) along with accessory mounts to facilitate HF radio antenna, telescopic work light, hi-lift jack and number plate.

Carrier arms are mounted on strong axle pivots with vehicle grade roller bearings and feature rubber coated locking handles for non-slip and comfort, gas strut assisted opening and hold back with a hold open lock.

Color coding to closely match vehicle panel colors is available as an option.
